Report of the Government Statist and Registrar-General of Births, Deaths, and Marriages on Population and Vital Statistics for the year 1932.

POPULATION, YEAR 1932.

State.—On December 31st, 1932, the population of the State was estimated to be 587,439 (584,968), an increase of 2,471 (2,841) for the year. Except for 1929, 1930, and the war years, this is the lowest increase since 1901. Males numbered 303,575 and females 283,864.

Metropolitan Area.—The population of the metropolis on December 31st, 1932, was estimated to be 326,032 (324,337), an increase of 1,695, and representing 55·50 (55·45) per cent. of the population.

An area approximately within a 10-mile radius of the G.P.O., Adelaide, is called the metropolis and embraces the cities of Adelaide (36,354), Unley (41,675), and Port Adelaide (33,117), and the corporate towns of Brighton (5,587), Colonel Light Gardens (5,600), Glenelg (11,123), Henley and Grange (5,504), Hindmarsh (13,745), Kensington and Norwood (15,701), St. Peters (11,838), and Thebarton (14,638), and the district councils of Burnside (23,602), Campbelltown (3,719), Marion (6,248), Mitcham (17,669), Payneham (7,672), Prospect (20,238), Walkerville (4,768), West Torrens (16,282), Woodville (25,924), and Yatala South (5,025).

Numbers for State.—In 1932 the births registered numbered 8,521 (9,079), a decrease of 558 and 2,001 less than the mean of the previous five years. It was the lowest number since 1903 (8,475).

Numbers Metropolitan Area and Country.—The births in the city and suburbs for 1932 numbered 3,850, and in the country districts 4,671, the respective rates per 1,000 mean population being 11·84 and 17·91. NOTE.—Births are classified according to the usual residence of the mother.

Multiple Births.—Twin births numbered 96 (93) sets. Males 90 (86) and females 102 (100). There were two sets of triplets in 1929 but none since. In 1919 there was one quadruple birth of four males, and for the ten years 1923 to 1932, seven sets of triplets and 1,136 of twins.

Sexes.—Males numbered 4,353 (4,616) and females 4,168 (4,463). The males always exceed the number of females born, the average number of males born to every 100 females for 1932 being 104·44 (103·43), being 1·01 more than the previous year.

Ex-Nuptial Births.—283 (302) were registered during the year. The percentage on total births registered was 3·32 (3·33). The percentage of ex-nuptial births in this State for many years has been much lower than that of any of the States or New Zealand.

Legitimations.—31 (26) were legitimated under the Act during the year.

Still-Births.—In this State the law does not at present provide for the registration of still-births. Certificates of the stillborn are issued by the Departmental Registration Officers for Maternity Allowance, and from this source the following numbers have been ascertained. They give an indication of the probable number for the State :—1925, 296 ; 1926, 317 ; 1927, 285 ; 1928, 290 ; 1929, 334 ; 1930, 232 ; 1931, 184 ; 1931 figures are incomplete as from 22nd July, the allowance is only paid where income does not exceed £260 per annum. From 5th October, 1932, the income limit was reduced to £200, and the applications for the year were 217.

Adoptions.—The Adoption of Children Act was brought into operation in October, 1926—for the balance of that year 160 were adopted :—1927, 198 ; 1928, 127 ; 1929, 119 ; 1930, 96 ; 1931, 74 ; 1932, 97.

Natural Increase.—The annual natural increase—excess of births over deaths—for the five years 1925-1929 was 1·11 percentage of the population. For the five years immediately preceding (1920-1924) it was 1·37 per cent., and for the pre-war period (1910-1914) it was 1·77 per cent. For the year 1932 it was 0·61 (0·72) per cent.

Crude Birth Rates.—The birth rate per 1,000 of mean population for 1932 was 14·54 (15·56). Each succeeding year of the last ten years has been the lowest in the record of the State. Fortunately the death rate has also fallen during the last ten years and slightly lessened the effect of the rather substantial fall in the crude birth rates.

Rate per Number of Women 15-44 Years of Age.—The rates referred to in the previous paragraph have been calculated as is usual on the total population, but are termed " crude " for a more reliable method is to base the rate on the number of women of child-bearing ages living during the year. These numbers are only known with exactitude at the Census periods. It has been assumed in the following calculation that the number of married women between ages of 15 and 44 years living in each of the years 1920-1929 was in the same ratio to the total population as for the Census 1921. The mean annual birth rate (excluding ex-nuptial births) per 1,000 married women between the child-bearing ages of 15 and 44 estimated as living in each year was for the period 1920-1924, 181·93, and for the five years 1925-1929, 159·63, a fall of 22·30 per 1,000, or 12·3 per cent. compared with the fall in the crude rate for the same periods of 14·6 per cent, a difference of 2·3 per cent. The rates for the last three census years have been—1901, 235·02 ; 1911, 237·74 ; and 1921, 187·85.

For the five years' period 1910-1914 (just prior to the war) the annual birth rate averaged 27·98 per 1,000 of mean population. The average rate for the five years' period 1925–1929 was 19·96, a fall of 8·02 over the period 1910-1914. For the year 1932 it was 14·54 (15·56).

MARRIAGES.

Number of Marriages.—3,636 (3,069) marriages were registered for the year 1932, an increase of 567, but 113 less than the mean of the five previous years. The rate per 1,000 mean population was 620 (5·26).

Officiating Ministers.—At the close of the year there were 683 Ministers of Religion and 31 Registrars enrolled with power to celebrate marriages. The Act provides that when a marriage is celebrated by a minister he must send within seven days, one certificate to the District Registrar and one certificate with licence, &c., to the Registrar-General, and at the end of each quarter a statement of all the marriages celebrated by him during such period.

Of the total marriages for the year Methodist Ministers celebrated 1135, or 31·2 per cent.; Church of England, 799, or 22·0 per cent.; Roman Catholic, 387, or 10·6 per cent.; the Registrars celebrated 393, or 10·8 per cent. Civil marriages have increased from 247 to 393 during the last 5 years.

The following table gives further particulars:—

Conjugal Conditions of those Marrying.—Bachelors 3,322 (2,840) spinsters 3,440 (2,904), widowers 241 (190), widows 144 (127), divorced men 73 (39), divorced women 52 (38).

Of the 3,322 (2,840) bachelors, 3,224 (2,748) married spinsters, 69 (66) married widows, and 29 (26) married divorced women.

Of the 241 (190) widowers, 159 (128) married spinsters, 66 (57) married widows, and 16 (5) married divorced women.

Of the 73 (39) divorced men, 57 (28) married spinsters, 9 (4) widows, and 7 (7) divorced women.

Ages of those Marrying.—The numbers marrying at each of the following age groups were:—Under 21 years of age, 233 males, 805 females; 21 years and under 45 years, 3,172 males, 2,714 females; 45 years and upwards, 231 males and 117 females. Total 3,636 males, 3,636 females.

The mean age of those marrying for the year was for males 28·50 (28·17), and females 24·94 (24·64). These means have only varied by decimal points for years, the tendency being a slight decline.

Numbers Over 70 Years of Age.—During the year 16 (19) persons married being over the age of 70 years, 14 were males and two females.

Marriages of Minors.—The written consent of a parent (the father if alive) is necessary in the case of a marriage of a person under 21 years of age. During the year 1,038 (1,003) minors were married representing 14·3 (16·3) per cent. of the total persons marrying. The numbers at each age were as follows:—

	13.	14.	15.	16.	17.	18.	19.	20.	Total.
Males	— (—)	— (—)	— (—)	1 (1)	6 (10)	35 (31)	75 (67)	116 (101)	233 (210)

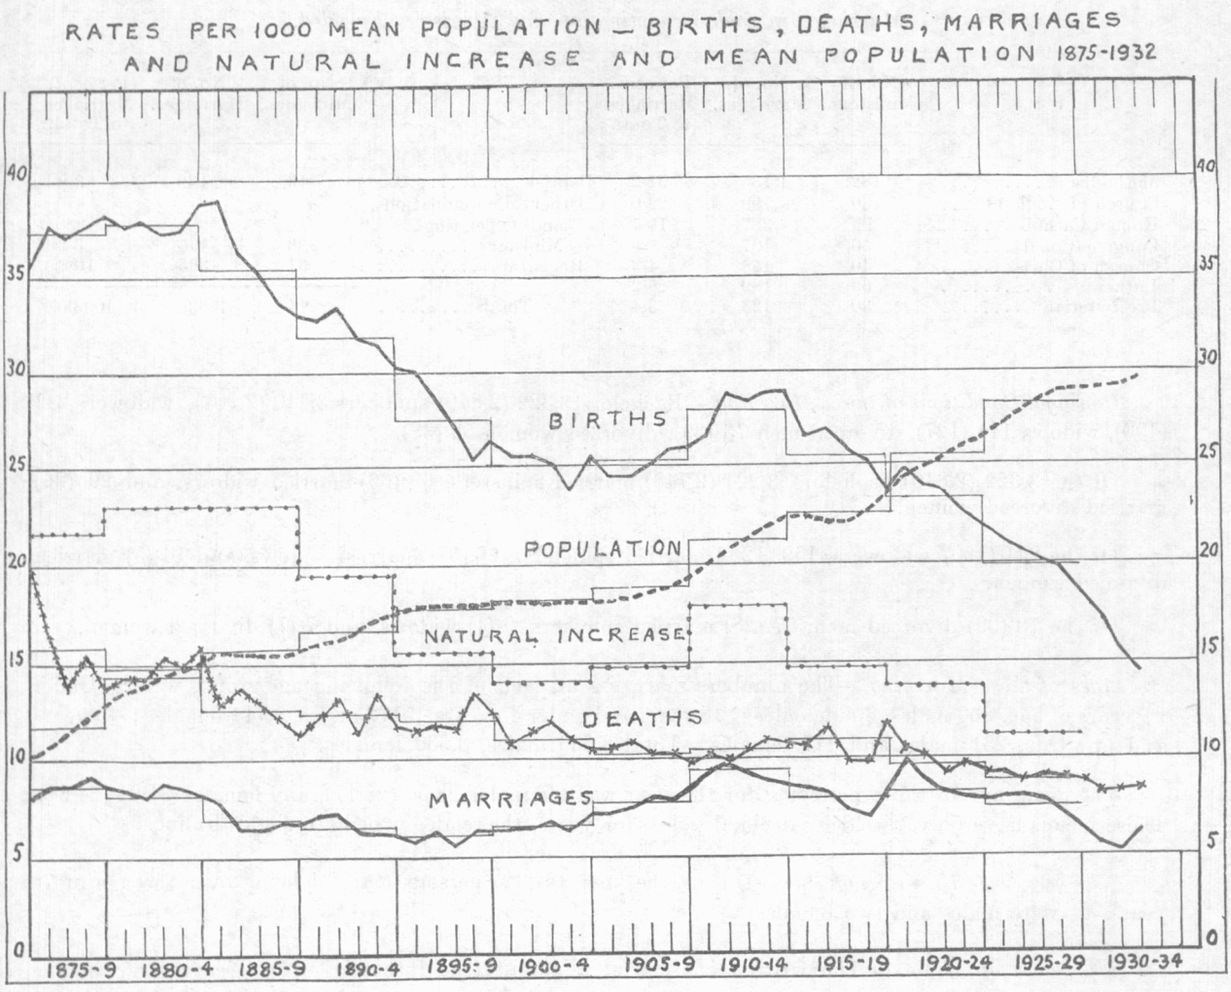
Divorces.—131 (139) marriages were dissolved by divorce and decree of nullity during the year. Th increase has been considerable since the war. For the five years 1910-1914, the annual average was 12·2 1915-9, 19·0; 1920-4, 73·2; and for the five years, 1925-9, 94·8.

Marriage Rates per 1,000 *of Mean Population.*—The annual rates per 1,000 of mean population for quinquennial periods from 1900-1929 and the years 1930 to 1932 were as follows:—

Period.	Rates.	Period.	Rates.	Period.	Rates.
1900-1904.....	6·59	1915-1919	7·94	1930.....	5·70
1905-1909.....	7·93	1920-1924	8·53	1931.....	5·26
1910-1914.....	9·38	1925-1929	7·46	1932.....	6·20

The marriage rate for 1932—6·20 is higher than the two previous years, but is lower than the annual mean of the five years ended 1929, 7·46, which was lower than the four preceding quinquennial periods. The pre-war period 1910-1914 had the high annual average of 9·38.



Explanation of Graph.—The base of each small rectangle represents the years, and the annual means of quinquennial periods are also shown. The figures to the left and right of the diagram represent the marriage, birth, death, and natural increase Rates per 1,000 of mean population. For the mean population of each year and quinquennial period the figures must be multiplied by 20,000.

DEATHS.

Numbers for State.—The deaths registered during the year numbered 4,957 (4,888), an increase of 69 but 54 less than the mean of the five previous years. Males numbered 2,632 (2,638), and females 2,325 (2,250).

Metropolis and Country.—3,032 deaths occurred in the metropolitan area and 1,925 in the remainder of the State. The rates per 1,000 population were—Metropolis, 9·32; remainder of State, 7·38. NOTE.—Deaths are classified according to the usual residence of the deceased person.

Crude Death Rate per 1,000 *of Mean Population.*—The death rate of total registrations for 1932 was 8·46 (8·38), being the lowest on record except for the previous two years. It is gratifying to record a substantial decrease in the rate during the last thirteen years, it being 11·69 in 1919.

The annual mean rate per 1,000 of population for the quinquennial period, 1900-1904, was 10·99. For the period 1920-1924 it fell to 9·66, and for the five years 1925-1929 to 8·89, a decrease of 2·10 from 1900-1904. This fall helped to counter the effect of the regrettable fall in the birth rate upon the net natural increase in population. The net natural increase fell from an annual mean of 14·06 per 1,000 of population for the years 1900-1904 to 11·07 for the years 1925-1929, a decrease of 2·99.

Death Rate of Sexes.—The annual mean crude death rates for the period 1900-1904 was 12·04 per 1,000 of population for males and 9·94 for females, and for the period 1925-1929, 9·47 for males and 8·28 for females. The death rate of males is th us seen to be much higher than for females and to have fallen since the period 1900-1904 by 2·57 and females by 1·66 per 1,000 of population, equal to 21·35 per cent. for males and 16·70 per cent. for females.

The following are the particulars for the period 1900 to 1932 :—

Deaths of Centenarians.—The deaths of 1 male at 100 and 2 females (1-101 and 1-103) were registered for the year. The previous year there were one male at 101, one male at 100, and no females.

Deaths in Age-groups.—312 (330), or 6·29 (6·75) per cent., of the total deaths occurred within the first year of life, and 435 (450), or 8·78 (9·21) per cent., within five years of life; 639 (636), or 12·89 (13·01) per cent. of the total were under 20 years of age, and 1,926 (1,883), or 38·84 (38·52) per cent., were 70 years and over. Causes of Death.—The Statistical Classification of the Causes of Death adopted is in accordance with the International List of Causes of Death as revised in 1929. Previous to 1931, the 1920 revision had been used.

The number of deaths, male and female, from each of the causes set forth in such list, and in the age-groups decided upon by the Conference of Statisticians and Health Authorities in 1928, have been classified and may be found in Tables Nos. 28 and 29 of this Section of the Statistical Register. The principal causes only can be referred to in this report, and are set forth in the following table. The percentage of each to the total deaths andthe rates of each per 10,000 of population are also shown.

Diseases of the Heart.—From the foregoing it is noted that diseases of the heart, account for the greatest number of deaths, though the rate per 10,000 of mean population from 1910 to 1930 varied but little except during the war period when it increased. In quinquennial periods the average annual rates per 10,000 of population were :—1910-1914, 11·11 ; rising in the war period 1915-1919 to 12·16 ; 1920-1924, 10·66 ; and 1925-1929, 10·42.

For the year 1932 the deaths totalled 857 (802), increase 55, the number being equal to 17·29 (16·41) per cent. of the total deaths and 14·62 (13·74) per 10,000 of the mean population. It is probable that nearly two-thirds of the substantial increase since 1930, and decreases under senility and ill-defined diseases, are the result of the movement initiated for more definite medical certificates, the better classification having proved the 1930 and previous figures to have been understated.

Cancer and Tuberculosis.—Up to the year 1917, with the exception of the year 1914, the death rates from cancer were less than from tuberculosis of all kinds, but from that year to the present the death rate from cancer has increased, except for a fall in 1932, whilst the death rate from tuberculosis (all kinds) has decreased except for a rise in 1931. In 1910 the death rates from tuberculosis of the respiratory system fell below those of cancer and have continued to fall, whilst the rates for cancer continued to rise. These fluctuations areseen in the graphs on page 9.

The following are the comparative particulars for the years 1910 to 1932 :—

1932 (")	275	4·69	4·04	654	11·16

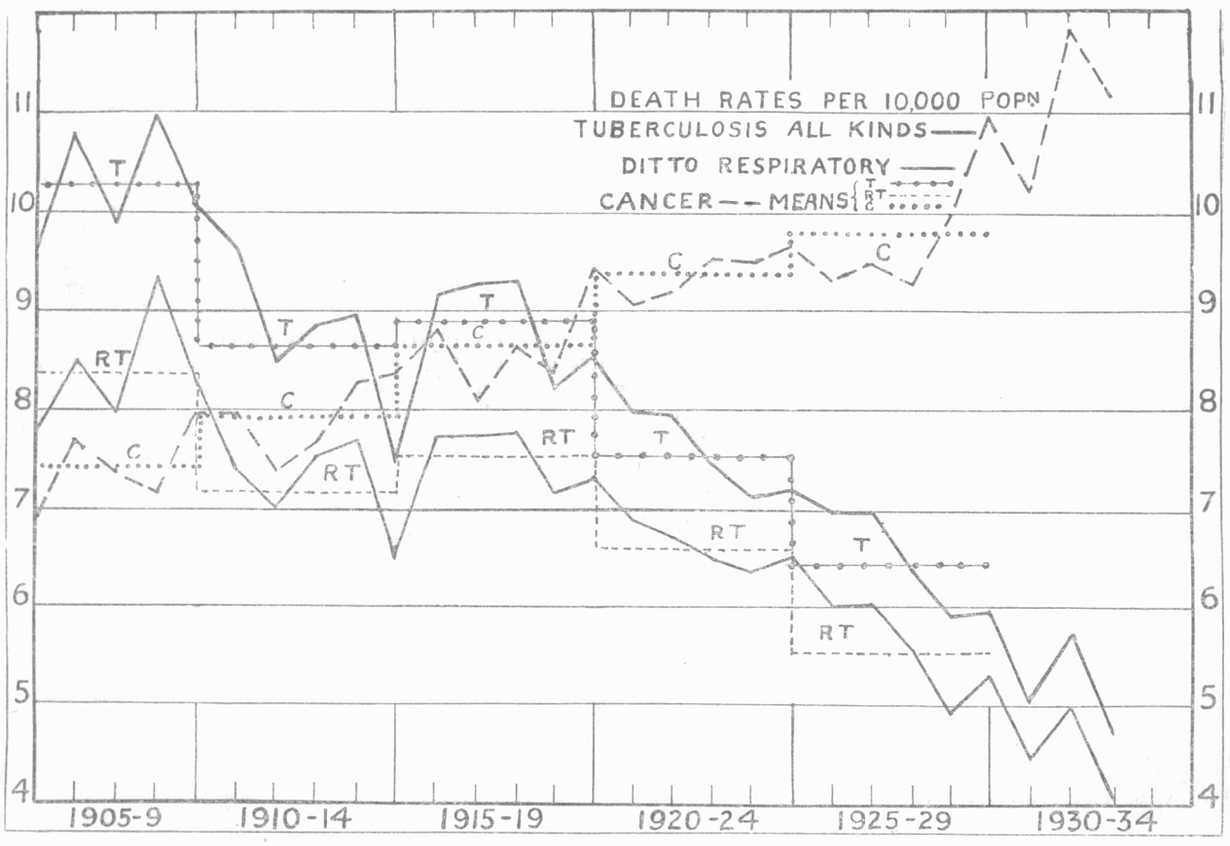
From the foregoing table it is noted that the deaths per 10,000 of population from tuberculosis averaged annually 8·65 for the period 1910-1914, and those for cancer 7·94, or ·71 less than tuberculosis, whilst the annual averages for the last five years, 1925-1929, were—Tuberculosis, 6·43 and cancer 9·80, the rate for cancer being 3·37 above tuberculosis for the latter period, whilst for the year 1932 the average per 10,000 of population from tuberculosis was only 4·61 (5·69) and from cancer 11·16 (11·81).

Tuberculosis of the Respiratory System.—Out of the total deaths from tuberculosis of all kinds 275 (332) for the year 1932, tuberculosis of the respiratory system caused 237 (292) deaths, or 86 (88) per cent. The rates for the two years were 1932, 4·04, 1931, 5·00; a considerable fall on previous years. For the period 1910-1914 it was 7·18, or greater by 3·14 per 10,000 of population than in 1932.

Cancer—Seat of Disease.—Cancer of the stomach and duodenum 159, 95 males and 64 females, breast 71, male genital organs 57, and uterus 40, are the chief seats of the disease. Of the total cases of deaths from cancer—654, the respective proportions were 24·31, 10·86, 8·72 and 6·12 per cent. Further details are shown in Returns Nos. 23 and 24.

The annual rates and quinquennial means, per 10,000 of mean population for both tuberculosis and ancer for each of the years 1905 to 1932 are shown in the following graph :—

DEATH RATES TUBERCULOSIS AND CANCER 1905 - 1932.



Explanation of Graph.—The figures to the left and right of the diagram represent the rates per 10,000 of mean population, and these rates are plotted for each of the years 1905 to 1932 with the means for each of the quinquennial periods 1905-9 to 1925-9 marked off at base. The letters "C" signifies cancer, "T" Tuberculosis of all kinds, "R.T." Tuberculosis of the Respiratory System.

Pneumonia (including Broncho-pneumonia).—Total deaths 332 (336), rate 5·67 (5·76). The annual rate for the period 1910-14 was 5·15, and for the period 1925-29, was 6·43, an increase in the latter period over the earlier of 1·28 per 10,000 of population. Broncho-pneumonia deaths were 197 (170), and Lobar, 119 (131).

Bronchitis, Acute, Chronic, and Unspecified.—Total deaths 64 (62), rate 1·09 (1·06). Bronchitis averaged annually the five years 1925-1929, 1·77 per 10,000 population, and 2·93 for the years 1910-1914, a decrease of 1·16 per 10,000 of population.

Other Respiratory Diseases.—Excluding the deaths from pneumonia, 332 (336); and bronchitis, 64 (62), the total deaths from other respiratory diseases numbered 101 (115), the principal causes being—pleurisy, 15 (34); congestion and haemorrhage of lungs, 50 (50); asthma, 16 (14).

Epidemic, Endemic, and Infectious Diseases.—These classes of disease were responsible for 377 (477) deaths, which includes the 275 (332) deaths from tuberculosis already reviewed. The remaining chief causes were :—Typhoid fever, 13 (10); whooping cough, 4 (6); diphtheria, 11 (14); influenza, 12 (37); dysentery, 3 (15); syphilis, 12 (13).

Notifiable Infectious Diseases.—Certain proclaimed infectious diseases are notifiable under the Health Act to the Central Board of Health. A total of 6,809 (4,027) cases were reported during the year.

The principal diseases were diphtheria, 517 (666); typhoid fever, 46 (56); erysipelas, 94 (126); measles, 45 (193); puerperal fever, 67 (71); pulmonary tuberculosis (phthisis), 342 (403); scarlatina and scarlet fever, 837 (477); whooping cough, 1,542 (495); chicken pox, 928 (950); influenza, 44 (504); dysentery, 31 (26). Mumps were gazetted as a Notifiable Disease on May 26th, 1932, and 2,292 cases were notified for the balance of the year.

Cerebral Haemorrhage, Embolism and Softening.—Total, 442 (433). The annual rate per 10,000 of population for the five years, 1925-29, was 6·34. For the period 1910-1914 it was 4·75, 1915-1919, 5·60, and 1920-1924, 6·31. Thus it is seen the increase has been continuous. For 1932 it was 7·54 (7·42).

Diabetes Mellitus.—113 (87). Males 39 (28), females 74 (59). Of the total 96 (72) were 50 years of age and over.

Puerperal Diseases, Accidents of Pregnancy and Confinement.—Total 44 (42). Of this number 9 (9) were recorded as due to puerperal septicaemia. The rate is equal to 5·16 (4·63) per 1,000 live births.

External Causes.—Total 324 (289). The principal causes were—Suicides, 51 (71), equal to a rate of 0·9 (1·2) per 10,000 of population; accidental drowning, 52 (30); automobile accidents, 50 (35); traumatism by falls, 39 (60); homicides, 10 (10); excessive heat, 25 (2).

Infantile Mortality.

There were 312 (330) deaths of infants under one year of age, a decrease of 18. The average per 1,000 live births was 36·62 (36·35), which was only 0·27 more than the record of the previous year, which was also the lowest yet recorded for any State. For many years South Australia, in common with the other States of the Commonwealth and New Zealand, has had a very low mortality rate for infants under one year of age compared with other countries. But even so the economic loss to the State is considerable, for in the last 10 years 5,054 infants died before reaching the age of one year and, in addition, 1,567 before reaching five years of age, making a total loss of 6,621 under five years of age. In other words, the State has lost by death during the last 10 years approximately one baby in every 20 born before reaching the age of one year with an additional loss before the age of five is reached. Further, there is the loss of unrecorded still-born children, approximately 300 annually. (See paragraph *re* still-births, page 4).

Deaths under One Year and Rates per 1,000 Live Births, 1895–1929, in Means of Periods of Five Years, and Yearly 1926–1932.

1925–1929	526	46·54	1932	312	36·62

The annual mean death rate of infants under one year of age for the five years 1895-1899 was 110·25 and for the five years, 1925-1929, only 46·54. The fall of 63·71 per 1,000 live births is certainly very gratifying.

Still there are points revealed by an analysis of the facts which are not satisfactory. I refer to the record of deaths under one month of age. Practically the whole of the improvement has taken place in the rates for ages above one month and under 12 months.

In the tabulated summary and in the graphs the rates for deaths of infants under one month, under one week, and under one day of age are shown separately, and these show very little progress.

Under one month for the period 1900-1904 the mean rate was 32·85, and 1925-29, 27·08, a fall of only 5·77, whilst for the ages one month and under 12 the rates for the same period were 59·10 and 19·46, a fall of 39·64. Further, during the last period, of the total number (1,531) dying within one month of life 1,149, or 75 per cent., died before reaching the age of one week, and 575 or 38 per cent. of the 1,531 were less than one day old. The great majority of those dying under one month of age died from pre-natal causes.

The annual mean number and annual mean rates per 1,000 births of infants dying within the following ages were as follows :—

Pre-natal Causes of Death.—Code Nos. 157—161. During the five years, 1925–29, deaths from malformations, congenital debility, premature births, and other diseases of early infancy which may be termed " Pre-natal Causes " accounted for 1,609 deaths, or 61 per cent. of the total dying within one year of age compared with 43 per cent. for the period 1910-14. Nearly all of these deaths occurred within one month of birth. Deaths from diarrhœal diseases for 1925-29 were 282, or 11 per cent. compared with 26 per cent. for 1910-14, and other diseases 738, or 28 per cent. compared with 31 per cent.

The average percentage of loss from pre-natal causes is greater for the period 1925-29 than for the previous three quinquenniums. These facts indicate the direction in which efforts for the saving of infant life should be directed.

Sexes.—The number of boys dying before reaching one year of age for the last five years numbered 1,170 and girls 933, the deaths of boys being 25 per cent. greater. For 1932—of the total deaths 312 (330)—173 (189) were males and 139 (141) were females.

Care of Infant Life.—The Mothers' and Babies' Health Association, formerly called "School for Mothers Institute and Babies' Health Centre," has 45 branches in the State; 38 of which are in the metropolitan area. The Government makes an annual grant of £2,500 to the Association. During the year ended July 31st, 1932, the nurses paid 2,726 visits to expectant mothers and 28,021 to young babies. Baby clinics are also established in the State, and during 1931-32, 94,791 examinations of babies brought by mothers were made and advice given when necessary. There is a creche in the city where babies may be left during the day whilst the mothers are earning their own living.

INDEX OF MORTALITY.

The death rates previously quoted in this Report are crude rates, being the numbers per one thousand of the mean population, and do not take into account the sex and age constitution of the people. In order to compare the mortality of various countries on a uniform basis, the sex and age distribution of a standard population compiled by the International Institute of Statistics is used in computing an Index of Mortality. The index for South Australia for 1932 was 8·72, compared with 1922—9·39, 1923—9·90, 1924—9·50, 1925—9·43, 1926—9·02, 1927—9·30, 1928—9·23, 1929—8·99, 1930—8·69, and 1931—8·69.

ANATOMY ACT, 1884.

The Inspector of the School of Anatomy reported, under Clause 6, that 21 (12) bodies had been removed to the University School of Anatomy for anatomical examination.

Statistical Register of South Australia, 1932-33.

Part IV.—TRADE, TRANSPORT, AND COMMUNICATION.

REPORT OF GOVERNMENT STATIST ON TRADE FOR 1932-33.

The values given herein of goods imported from countries beyond the Commonwealth represent the amount on which duty is payable, or would be payable if duty were *ad volerum*. The value of goods subject to duty is taken to be the fair market value in the principal markets of the country whence the same were exported, with an addition of 10 per cent. to such value to cover insurance, freight, and other charges to place of landing. The value of goods exported is in general the value in the principal market of the State in the ordinary commercial acceptation of the term. *See also notes at head of Returns* 21 *and* 23.

All figures in parentheses are those for the previous year, inserted for comparative purposes.

Total Trade Values (*Recorded Values*).—The grand total value of trade for the year was £1,508,334 more than the previous year, the respective totals being £16,577,278 (£15,068,944) equal to £28 12s. 4d. (£26 2s. 3d.) *per capita*.

Imports (*British Currency Values*) totalled £3,760,324 (£2,821,538), an increase of £938,786, the total value averaging £6 9s. 10d. (£4 17s. 10d.) *per capita*. Increases were noted in bags and sacks, drugs and chemicals, fertilizers, petroleum spirit, kerosene, and other oils, metal manufactures, textiles, piecegoods, glassware and motor vehicles. The value of imports had fallen from £15,507,260 in 1926-27, to £2,821,538 in 1931-32, but increased to £3,760,324 in 1932-33. The value of imports in Australian currency was approximately £4,700,000.

Exports (*Australian Currency Values*) totalled £12,816,954 (£12,247,406), increase £569,548, the total value averaging *per capita* £22 6s. (£21 4s. 5d.) The prices for wheat, barley, butter, cheese, lambs, tallow, lead, and iron ore were lower than for 1931-32, and higher for flour, eggs, wool, sheepskins, concentrates, salt, and sandalwood. The previous record quantities shipped (in parentheses) were exceeded in the following items :—Butter, 9,500,027 (7,400,628) lbs. ; eggs in shell, 3,842,870 (2,026,220) dozen ; cheese, 1,578,780 (908,847) lbs. ; raisins, 18,914,342lbs. was the highest except for 1930-31—20,660,845lbs. ; and salt, 170,615cwts., highest except for 1920-21—186,789cwts.

BALANCE OF TRADE AND INTERSTATE TRADE.

Balance of Oversea Trade, £9,056,630 (£9,425,868).—The recorded excess of exports over imports for the year 1932-33 was £9,056,630 (*i.e.*, if exchange were normal), as compared with £9,425,868 for the previous year, 1931-32, a decrease of £369,238. The excess of exports for the year 1932-33 is estimated at approximately £8,100,000 in Australian currency, or £6,450,000 in British currency values.

This balance is subject to qualification, as those intimately acquainted with trade statistics well know, but as many of the business public do not know, to avoid misunderstanding an explanatory note appears necessary.

The balance represents the result of the State's direct trade with oversea countries, but it includes Broken Hill products imported to this State and re-exported. South Australia only benefits on these to the extent of the added value as a result of treatment at Port Pirie and transit. South Australia does a heavy volume of trade with the other States, a complete record of which is unfortunately impossible. If known it is probable that the adverse interstate balance would substantially reduce the oversea credit balance.

Interstate Trade of South Australia.

With the aid of the Railway and Harbour Departmental records and the courtesy of traders the Government Statist has for some time past been accumulating much useful data as to our Interstate trade, which indicates definitely that this State does a fairly substantial export trade to other States, as follows :—Wine and brandy, £432,277 (£421,945) ; motor bodies, £505,348 (£187,660) ; wheat, barley, and flour, £468,627 (£438,658) ; bark and salt, £128,889 (£124,469) ; and iron ore, £699,264 (£352,962). Substantial export trade is also done in metal manufactures, cheese, soap, bacon and ham, jams, leather, gypsum, &c. Not much information is available as yet regarding imports, but coal and sugar would total approximately £1,453,922 (£1,391,993), less exports of same to Broken Hill and Western Australia. Apparel and attire would probably be a heavy item, also livestock and wool. Timber from Western Australia in 1932-33 was valued at £67,341 (£32,963).—See Return Nos. 14 to 18.

Trade with Western Australia.

In Western Australia complete records are kept of Interstate trade. A review of these has been made and the results should be informative to the local traders doing business with that State. For the year 1932-33 Western Australia imported from the States £8,370,113, of which this State contributed

£663,814, or nearly 8 per cent. Cannot this proportion be increased in view of the closer geographical position ? With this objective the products of trade have been reviewed, and some are set forth as follows, with the South Australian proportion in parentheses :—

Butter, £208,790 (£5,320) ; cheese, £88,158 (£17,759) ; bacon and ham, £45,846 (£27,242) ; boots and shoes, £354,267 (£3,125) ; agricultural implements, £238,584 (£21,031) ; metal manufactures, £890,654 (£47,221) ; leather and leather manufactures, £68,254 (£7,399) ; pickles and sauces, £35,026 (£2,809) ; ale and beer, £113,011 (£13,761) ; jams and jellies, £24,230 (£19,389) ; biscuits, £7,139 (£1,363) ; confectionery, £173,379 (£2,915).

In many of the foregoing items this State might probably secure a greater proportion of the business. In the following items this State supplies either the total trade or nearly so.

Eggs in pulp, £3,647 ; motor car bodies, £28,294 ; brandy, £8,520 ; wine, £57,122 (total, £63,483).

The balance of trade with Western Australia was in favour of this State for 1932-33 by £409,871 ; 1931-32 by £408,524 ; 1930-31 by £373,835 ; 1929-30, by £627,019 ; 1928-29 by £1,009,994.

Trade with Tasmania.

By the courtesy of the Tasmanian Statistical Office, details of the trade with this State have been supplied. For the year ended June 30th, 1933, the exports from South Australia to Tasmania were valued at £526,395 (£695,926), and the imports into South Australia from Tasmania £255,970 (£243,333), a balance in favour of South Australia of £270,425 (£441,593). DISTRIBUTION OF OVERSEAS TRADE.

Imports from United Kingdom and other British Possessions were greater in volume though less in percentage than those of 1931-32, whilst Foreign Countries were greater in both volume and percentage. The exports to United Kingdom were greater in both volume and percentage but Other British Possessions and Foreign Countries were lower in both volume and percentage.

VOLUME OF OVERSEA EXPORT TRADE.

It is probably generally known, though often overlooked, that fluctuating prices from year to year nullify statistics of values of exports as an index of the actual volume of trade. From 1918-19 to 1929-30 the recorded values of the State's annual exports were millions of pounds greater than previously. This from a currency viewpoint, was eminently satisfactory, but the fact remains that the substantial uplift was due to increased market prices and not to an increase of volume of trade. In the interest of the State this fact should be noted, for it is increased volume of production and volume of exports *per capita* that denote genuine progress. From 1930-31 to 1932-33 prices were lower, with a consequently low recorded value, but the volume was greater.

For the purpose of ascertaining the actual position as to the volume of trade, the annual exports for each year from 1910 to 1932-33 have been revalued on the basis of the export mass prices of 1911. The total annual value thus obtained represents the movement of volume of trade as against the value recorded.

1932-33	12,816,954	14,126,488	1,388	1,033	904

The high recorded value for 1919-20—£20,530,355—was due to the shipment of accumulated stocks, for during the war years of 1914-15 to 1918-19 very few ships were available. The values as at 1911 mass prices (column 2) have been converted to index numbers (columns 3 and 4), taking the year 1911 as base equal 1,000 and these represent respectively the total volume of the annual exports and the volume per inhabitant. Column (5) gives index numbers representative of the annual movement in export prices. For the whole period from 1911 to 1932-33 the total volume of exports has exceeded the 1911 base eight times—1919-20 by 16 per cent. ; 1923-24 by 1 per cent. ; 1925-26 by 3 per cent. ; 1927-28 by $5\frac{1}{4}$ per cent. ; 1929-30 by $18\frac{1}{2}$ per cent. ; 1930-31 by $13\frac{1}{3}$ per cent. ; 1931-32 by 37 per cent. ; and 1932-33 by $38\frac{4}{5}$ per cent. which is the greatest excess.

From the following graphs the State's oversea export trade can be readily traced for the whole period from 1910 to 1932-33.

CUSTOMS AND EXCISE NET REVENUE.

For the year 1932-33 the net revenue was £2,249,089 (£1,886,942), obtained from Customs duties, £1,356,012 (£1,094,715), excise duties, £878,750 (£777,662), and other, £14,327 (£14,565). Nearly forty-two per cent. of the total revenue was derived from Ale, Spirits, Beverages, and Tobacco, viz., £942,745 (£830,317).

The chief sources of revenue were :—*Ales, Spirit, and Beverages.*—Customs, £63,646 (£50,928) ; excise, £556,004 (£614,891) ; total, £619,650 (£665,819). *Tobacco, Cigars, &c.*—Customs, £4,739 (£3,314) ; excise, £318,356 (£161,184) ; total, £323,095 (£164,498). *Textile Goods, Apparel, &c.*—£79,844 (£55,013). *Metals and Machinery.*—£57,817 (£39,326). *Vehicles.*—£14,183 (£8,841).

DIRECT OVERSEA IMPORTS, 1932-33.

(For Alphabetical Index to Items see page 19).

No. 21.—Oversea Imports into the State of South Australia from July 1st, 1932, to June 30th, 1933.

NOTE.—With the exception of Great Britain, New Zealand, and Australia, and in cases where a single country is concerned, only those countries are shown under each article where the value of imports exceeds £100.

Value of Imports.—The value of goods imported from countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if duty were *ad valorem*. Section 154 (1) of the Customs Act, 1901-1930, provides that "where any duty is imposed according to value, the value for duty shall be the sum of the following:—

(*a*) (I.) The actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(II.) the current domestic value of the goods, whichever is the higher;
(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export; and
(*c*) ten per cent. of the amounts specified under paragraphs (*a*) and (*b*) of this subsection.

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country".

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit; where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity or weight, of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included".

Import Duties.—Duties charged on imports into South Australia are collected by the Commonwealth of Australia under various Acts.

DIRECT OVERSEA EXPORTS, 1932-33.

(For Alphabetical Index to Items, see Page 19.)

No. 23.—RETURN showing the Oversea Exports from the State of South Australia for the Year 1932-33.

NOTE.—The difference between the quantities and the value of Australian produce exported and the total quantity and value exported represents the quantity and the value of produce of oversea origin re-exported.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency, and is generally the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows :—

From July 1st, 1929, sugar (*a*) sold in Australia for export : The value f.o.b., at which the sugar is sold to oversea buyers ; (*b*) shipped on consignment : The f.o.b. equivalent of the ruling price of such sugar in the London markets. Butter : The current market value less the amount payable as export bonus. Goods on which bounty or rebate is payable on export : The value of the goods in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From July 1st, 1930. Wool (*a*) sold in Australia for export : The actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship ; (*b*) shipped on consignment : The f.o.b. equivalent of ruling Australian prices.

From July 1st, 1932. Wheat (*a*) sold in Australia for export : The f.o.b. equivalent of the price at which the wheat was sold ; (*b*) shipped on consignment : The f.o.b. equivalent of the current selling price overseas.

Exports of Australian Produce.—Articles which were partly or entirely manufactured from imported materials, raw material produced in the State and manufactures therefrom, are shown under this heading. No distinction is now made in the records between the produce of this State and that of other States of Australia, the whole being classified as Australian.

N.E.I. means " Not elsewhere included."

Ships' Stores.—Goods shipped as " Ships' Stores " on board oversea ships are not included in exports. For ships' stores see Table No. 18.

† Excluding £2,592,016 half-share of profits on resale of wool by Imperial Government to which the growers were entitled, under the sale agreement, and which was apportioned to the several seasons as follows:—1916-17, £293,202; 1917-18, £652,821; 1918-19, £812,022; 1919-20, £833,971.

‡ Interstate trade in wool, and wool used in local factories, are factors which cause differences between figures for oversea export and for actual production.

NOTE.—In compiling the above tables, the mean rainfall in each agricultural county has been first obtained from all available records within or on the borders of the county, and then weighted by the area of the county to obtain the mean rainfall for each Division and the State. Counties Hamley and Young (Murray Mallee), Derby, Lytton, and Taunton (Upper North), and Manchester and York (Western) being non-agricultural counties, are excluded in compiling the average rainfall for this return.

FACTORIES AND WORKS.

In comparison with the previous year, 1931-32, it is satisfactory to note an all-round improvement in the secondary industries of the State, and with few exceptions there were increases in the number of hands employed in the various industries. Throughout this report and the statistical returns, the average number of persons employed means the average number over the whole year, unless otherwise stated. Consequently in tables relating to employment, and in the computation of average salaries and wages paid, production per employee, &c., the average number for the whole year is used, instead of the average number during period of operation.

The following summary shows the State grand total for the last five years, with one year's increases or decreases:—

ESTABLISHMENTS, HANDS EMPLOYED (see paragraph above).

The establishments numbered 1,710 (1,662). The net increase of 48 is the result of 121 new factories less 73 which closed down or had decreased below the standard for classification as factories.

Industries showing the greatest increases in number of hands are as follows:—Motor body building, 839; woollen mills (including wool scouring), 218; agricultural implements, 181; iron and steel, 165; dressmaking and millinery, 262; engineering, 135; glassworks, 123; bricks and tiles, 101; tailoring, 75; sawmills (town), 55; furniture, 63. A few industries showed decreases. Fertilisers (chemical), 38; biscuits 13; gas, 19; soap and candles, 7.

Distribution of Hands.—The hands employed were classified as follows:—Working proprietors, 1,324 (1,313); managers and overseers, 1,144 (1,172); accountants and clerks, 1,931 (1,805); enginedrivers and firemen, 406 (421); workers, skilled and unskilled, and all others, 21,543 (19,119).

Average Time Worked.—The factories worked 11·54 (11·65) months during the year.

Salaries and Wages.—At a conference of Australian Statisticians held in 1924, it was agreed that where proprietors worked in the industry, thus occupying, as workers, positions for which they would otherwise need to employ and pay others, they be asked to show values as salaries for such services equivalent to what would have to be paid if employees were engaged in the same work.

For the year 1932-33 there were 1,324 (1,313) working proprietors, and salaries and wages on account of these were returned at £284,376 (£285,061), an average of £215 (£217). It should be remembered that in very many cases proprietors do not put their full time in the works section of their business.

The salaries and wages paid to all employees, including working proprietors, was £4,421,233 (£4,071,117), an increase of £350,116. This represents an average per employee of £167 16s. (£170 16s. 10d.). Males received £3,982,653 (£3,667,869), averaging £190 11s. (£193 15s. 5d.), and females £438,580 (£403,248), averaging £80 10s. 4d. (£82 5s. 7d.).

IV.—Total Value of Output and Production.

Output.—With few exceptions this value is representative of the selling value at the factory of all work done during the year. As all selling and distributing costs are excluded from the costs of manufacture previously referred to under headings of salaries and wages, they are also excluded from value of output. For the year this output value has been returned at £20,940,698 (£19,292,370), an increase of £1,648,328.

Production Value.—The annual value of production is defined statistically as the value of consumable commodities produced during the year, deducting as far as possible the value of goods consumed in the

process of production. This represents the value added to material as a result of treatment, and is estimated for the year at £7,854,500 (£6,961,848), an increase of £892,652, or 12·82 per cent, and is equal to £13 11s. 2d. (£12 1s. 3d.) per inhabitant.

Distribution of Gross Output Value.

The margin between the total expenditure on material, fuel, light, &c., used, salaries and wages paid (including working Proprietors) and the selling value of the output accrues to the manufacturer to cover all overhead charges, depreciation, and profits. For every £100 of output this margin was £16 7s. 11d. (£14 19s 8d.), an increase of £1 8s. 3d. The distribution of each £100 is as follows:—Salaries and wages (including working proprietors), £21 2s. 3d. (£21 2s. 0d.); fuel, light, &c., £3 13s. 1d. (£3 17s. 8d.); material used, £58 16s. 9d.; (£60 0s. 8d.) margin for all other expenses and profit, £16 7s. 11d. (£14 19s. 8d.). Total, £100.
